

# Name: Nishant Kumar Giri

Roll No: AC-1254

Course Name: BSc (Hons) Computer Science

Paper Name: Web Design and Development

Semester: 3<sup>rd</sup>

Q1. Design a web page with a table of content and on clicking any content a new web page should be opened.

## CODE

```
<!doctype html>
<html>

<head>
  <title> Acharya Narendra Dev College </title>

  <style>
    #navbar {
      background-color: #35455D;
      list-style: none;
      display: flex;
      overflow: hidden;
    }

    #navbar a {
      text-decoration: none;
      padding: 10px 70px;
      float: left;
      text-align: center;
      color: #E6E6FA;
      font-size: large;
      font-style: italic;
    }

    #navbar a:hover {
```

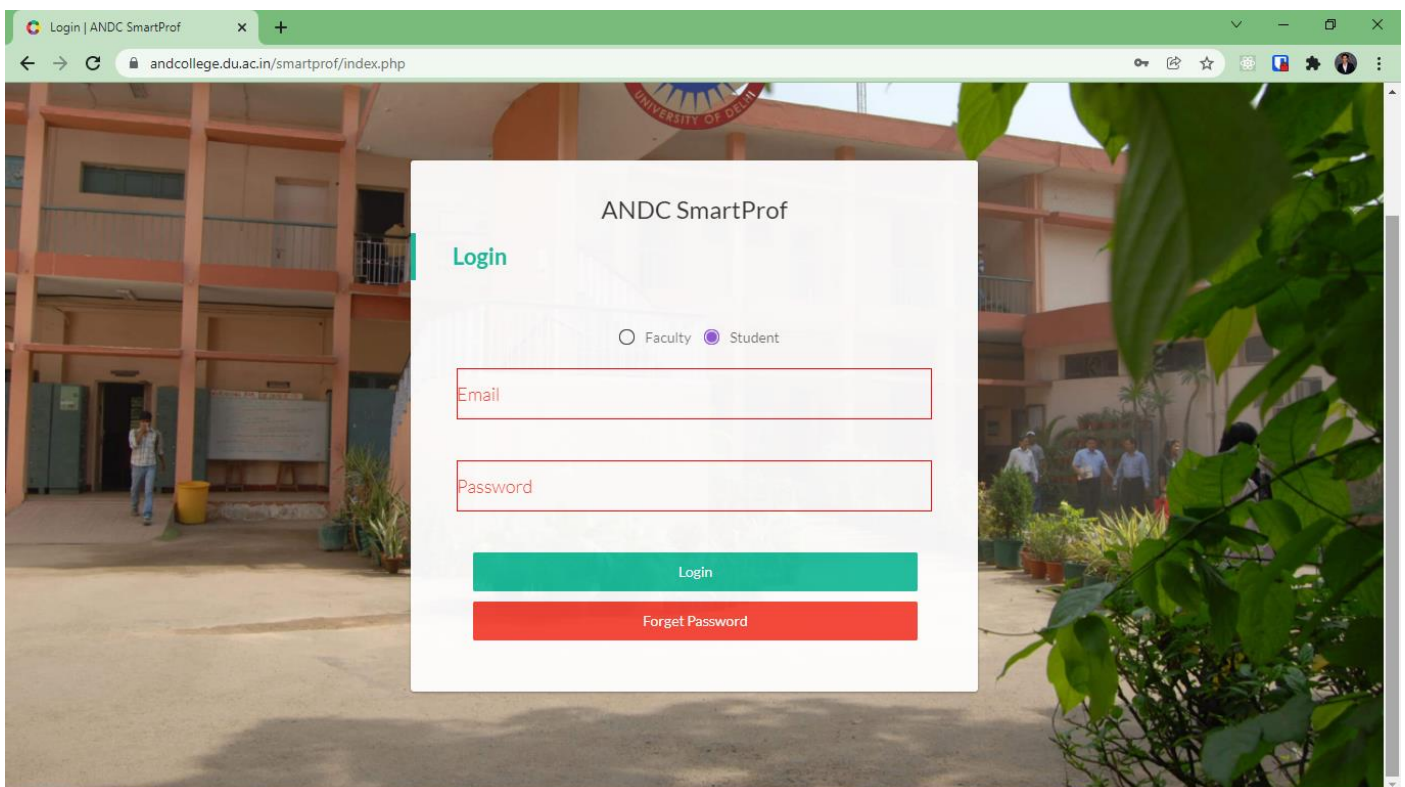

```
        <li><a
href="https://www.andcollege.du.ac.in/courses/undergraduate">UG
Admissions</a></li>
        <li><a
href="https://www.andcollege.du.ac.in/courses/postgraduate">PG
Admissions</a></li>
    </ul>
</li>
    <li><a href="#Departments">Departments</a>
        <ul>
            <li><a
href="https://www.andcollege.du.ac.in/departments/physics/coursesoffered">Physic
s</a></li>
            <li><a
href="https://www.andcollege.du.ac.in/departments/chemistry/coursesoffered">Chem
istry</a>
            </li>
            <li><a
href="https://www.andcollege.du.ac.in/departments/mathematics/coursesoffered">Ma
thematics</a>
            </li>
            <li><a
href="https://www.andcollege.du.ac.in/departments/electronics/coursesoffered">El
ectronics</a>
            </li>
        </ul>
    </li>
    <li><a
href="https://www.andcollege.du.ac.in/smartprof/index.php">SmartProf</a></li>
    <li><a href="https://www.andcollege.du.ac.in/contact">Contact
Us</a></li>
</ul>
</body>

</html>
```

# OUTPUT

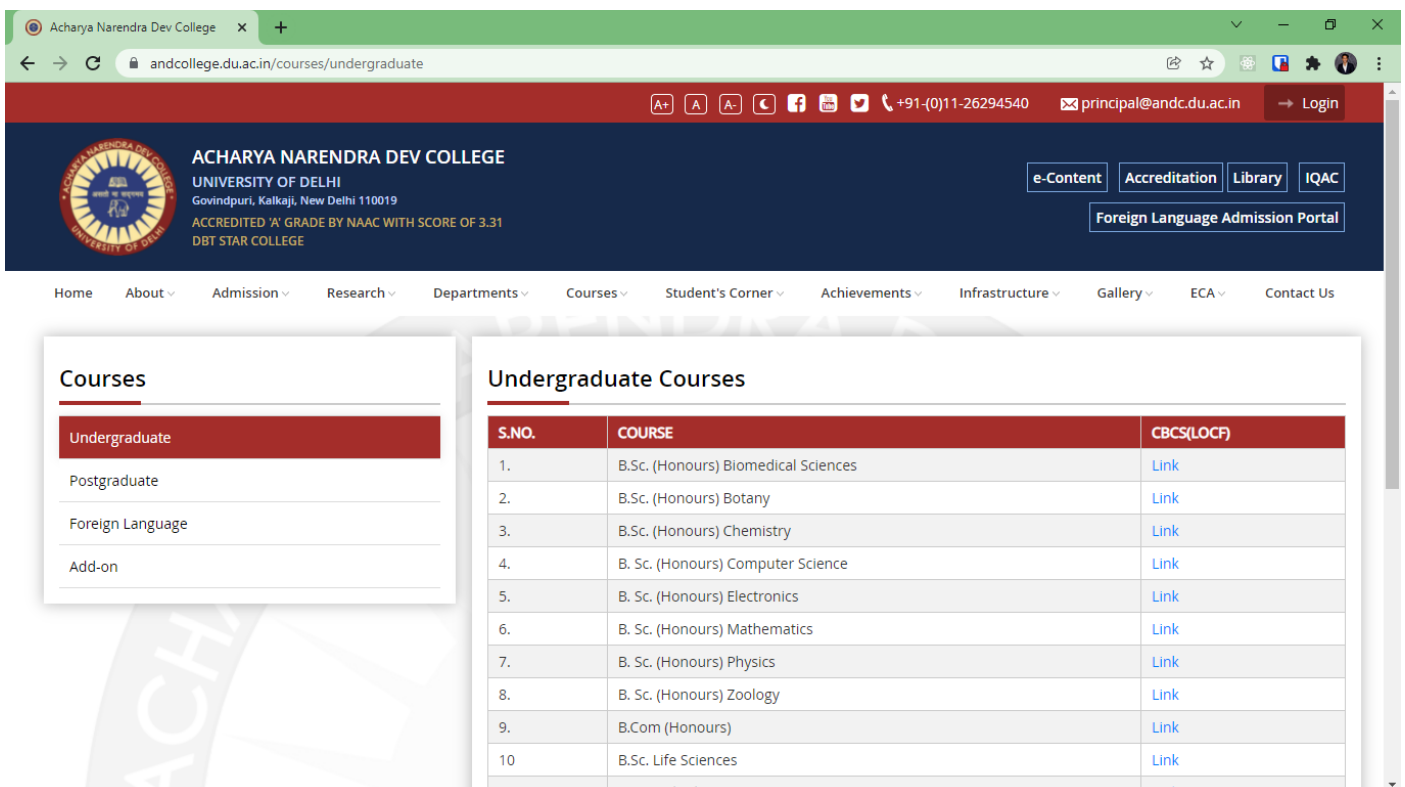

(clicked on SmartProf)

(clicked on UG Admissions)

(output of above action)

Q2. Write a PHP script to sort an array entered by the user.

## Code

```
<!Doctype html>
<head>
  <title>PHP Program 2</title>
</head>

<body>
  <form method="POST" action="sortArray.php">
    Enter 5 Numbers:<br />
    Number 1:<input type="text" name="num[]" required><br />
    Number 2:<input type="text" name="num[]" required><br />
    Number 3:<input type="text" name="num[]" required><br />
    Number 4:<input type="text" name="num[]" required><br />
    Number 5:<input type="text" name="num[]" required><br />
    <input type="submit" value="SUBMIT">
  </form>
</body>

</html>
```

```
<?php
```

```
    $i=0;
    foreach($_POST['num'] as $v)
    {
        $array[$i]=$v;
        $i++;
    }
```

```
    sort($array);
```

```
    $i=0;
    while($i!=5)
    {
        echo $array[$i]." ";
        $i++;
    }
```

```
?>
```

# OUTPUT

PHP Program 2

localhost/WDDFinalPractical/program2.html

Enter 5 Numbers:

Number 1:	5
Number 2:	1
Number 3:	2
Number 4:	9
Number 5:	6

SUBMIT

localhost/WDDFinalPractical/sort

localhost/WDDFinalPractical/sortArray.php

1 2 5 6 9
